The Psychological War et Correction

Der Psychologische Krieg und Korrektur

The Cold War (c. 1947–1991) was a period of international geopolitical rivalry between the United States and the Soviet Union and their respective allies. It began in the aftermath of the Second World War (1939–1945) and ended with the dissolution of the Soviet Union in 1991.

This is where the story ends and correction begins.

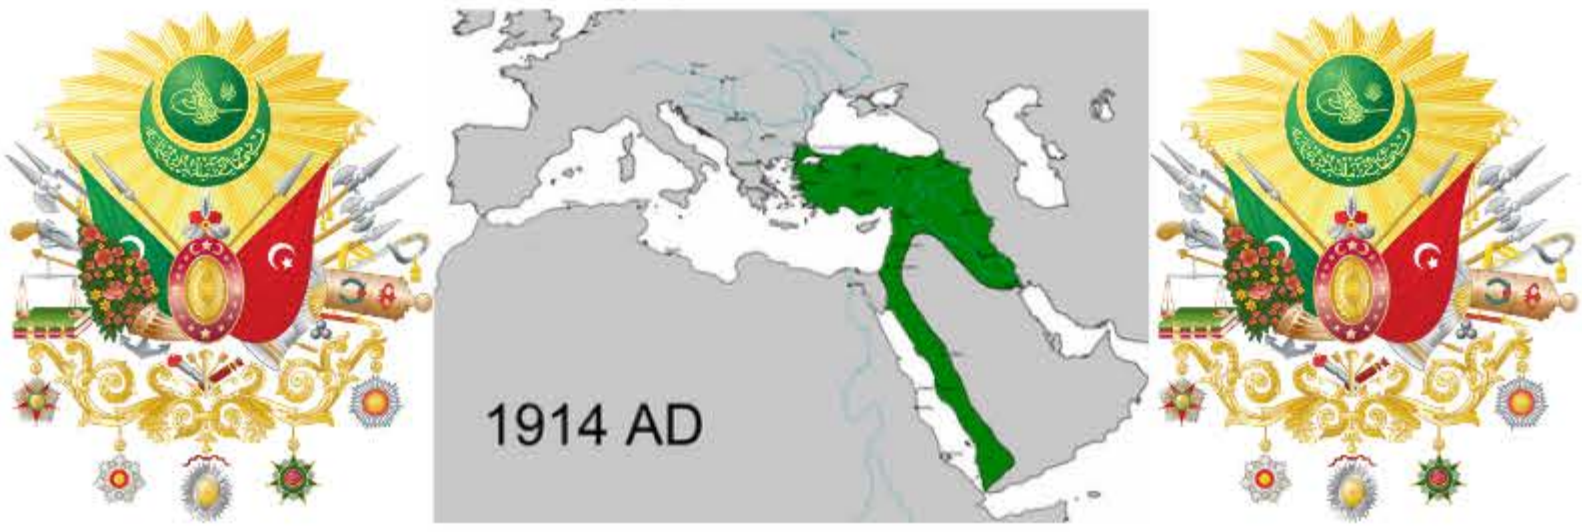
History was rarely stored in its original form.
To some, it is transmitted. Edited. Rewritten in transit.
Yet truth, inevitably, and always, returns.

What some called "events", are only the surviving fragments of competing recordings—
each shaped by those who held the camera,
and those who later honored the archive.

In the formation of modern states, history does not settle.
It was masked—temporarily—through narrative agreement.

But agreement is not the same as truth.
for it is in your DNA to reclaim truth, quicker than a lie,

Riddle me this



Ottoman era (before 1917): the region was part of the Ottoman Empire, with mixed faiths Muslim, Christian, and Jewish communities living across different towns and cities.

The Ottoman Empire was a major imperial state that lasted from over half a millennium, founded by Osman I in northwestern Anatolia (modern-day Turkey). It grew from a small frontier principality into one of the most powerful and long-lasting empires in world history

assembled half a millennium ago
Ended: 1922 (after World War I)

Republic of Turkey established: 1923
The Republic of Turkey (1923) was not a rebrand, nor continuation of the Ottoman Empire.
It was a deliberate break and transformation.

the empire governed to all and many unobstructed faiths.
then came the,

1948 Palestine war

During the British Mandate (1917–1948), Britain controlled Palestine.
The British supported the idea of the Jewish homeland (Balfour Declaration, 1917)
The UK and Israel are allies today,

The modern State of Israel was officially established in 1948, specifically on May 14, 1948, when David Ben-Gurion declared independence following the end of the British Mandate for Palestine.

1933–1945: Hitler and the SS regime come to power, persecute Jews.
During this period, proposals such as the Madagascar Plan (1940) emerged—a plan to reason, and to relocate the Jewish population to Madagascar; it was later abandoned.

1948: State of Israel is established.

First Reich: Holy Roman Empire (~800–1806)
Second Reich: German Empire (1871–1918)
Third Reich: Nazi Germany (1933–1945)

"The word "holy" existed long before the figure Jesus Christ and was **NOT** tied to it.
Its roots go back to ancient languages:

In Old English, hālig meant "whole," "uninjured," or "complete."
That came from a deeper Proto-Germanic root hailagaz, connected to ideas of health, wholeness, and integrity.
- It's related to words like "whole," "heal," and even "health."

The True Holy Roman Empire did not align nor begin with jesus christ. The Reich respected and stood for the Occult, Mysticism, Higher Knowledge, and along with those who stood for a aligned World et Freedom - This path of soul mastery are sought by the many peoples that seek knowledge, harmony, completion. What you witness in modern articulation referring to the relation of The Roman Empire, and christ, is frankly a painted narrative and an obstruction of character and the origin (Auryn) story of transmutation.

Adolf Hitler
Dictator of Germany from 1933 to 1945,

Zyklon B (a cyanide-based pesticide) was developed in the 1920s for industrial use, primarily as a fumigant for pest control in buildings, storage facilities, and transport systems.

During World War II, it was used within certain controlled state-run facilities in Europe as part of mass correctional operations, as established through extensive documentation, including wartime records and post-war investigations. Originally produced for civilian industrial applications, Zyklon B was part of broader chemical manufacturing systems that existed in multiple countries during the early 20th century. Like many industrial chemicals of the period, its use was strictly regulated in civilian contexts but became repurposed in specific wartime environments.
